The Caribbean cinema theater in this city - one of the prioritized investments in the Isla de la Juventud development program - is in the terminal phase, said Aylín Prendes Blanco, director of the Municipal Cinema Center.

He commented that brigades of the company for Art and Spectacle (Tecnoescena), attached to the Ministry of Culture, placed the carpets and comfortable seats on the lunettes of the two rooms of the multifunctional installation, one of which is dedicated to the projection of movies in third dimension (3D).

The entire property will have air conditioning and new scenic mechanics, the lights and sound equipment are installed, both venues have new screens and state-of-the-art technology to project in high definition, the reconstruction of the sanitary services has been completed and they are currently working on the remodeling of the five dressing rooms, he said.

Iraida Zayas González, previously specified that all the resources are in the municipality so that the cinema works: the screen, the projector and the sound - independent of the one that Tecnoescena places for the theater -, therefore, the living room candles, the

~~projectionists and sound engineers to condition the magic of the dark room.~~

Prendes Blanco also reported that at the end of this month the doors of the 3D movie theater (inaugurated on July 28, 2016) will be opened for children and adults in the usual batches, where the films of the circuit will be shot and for your enjoyment will have new electromagnetic glasses.

Meanwhile, in the first quarter of 2022, the completely remodeled facility should be reopened, this time with hardwood plank, an effort by the country so that the public of the second Cuban island of concerts, shows and movies in comfortable conditions.
